# INTRA-EXTRAORAL

M

### Class II corrector

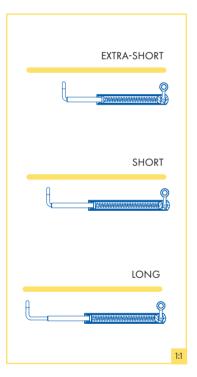

### **CLASS II CORRECTOR**

The non-compliance device for Class II correction.

The small sizes of the device allow for optimum patient comfort while the constant and light force delivered by the spring **MEMORIA**° 200 g, located inside the plunger, stimulates the mandibular advancement. In this new version, the fluidity of movement and the strength of the telescopic mechanism are improved. The packages include all the needful parts for the application of a bilateral correction device.

Available in **3 lengths** with both mesial and distal fitting to upper molar tube, for a total of 6 possible positions in the mouth. When used in the mesial position, it can be placed on a single direct-bonding tube without the need of band or round tube.

to vestibular tube to vestibular tube

To avoid breakage, the device should not be mounted at full compression: once in the mouth in habitual occlusion, a portion of the plunger coming out of the tube for at least **2 mm** should be visible.

\*PATENTED

### Available in 2 versions:

### with anterior eyelet

### with anterior hook

WITH ANTERIOR EYELET	WITH ANTERIOR HOOK	Туре	Length at full expansion (passive configuration)	Length at full compression (including 2 mm additional possible compensation, see page 162)	Maximum safety stroke of spring	Maximum opening allowed to prevent disassembly
M2302-00	M2301-00	EXTRA-SHORT	31 mm	25 mm	7,5 mm	48 mm*
M2302-01	M2301-01	SHORT	35 mm	28 mm	10 mm	56 mm*

### M2301-91 CLASS II CORRECTOR KIT

WITH ANTERIOR HOOK

Pack of 3 correctors with anterior hook (1 extra-short, 1 short, 1 long) and 6 measuring gauges

#### M2302-91

CLASS II CORRECTOR KIT WITH ANTERIOR EYELET

Pack of 3 correctors with anterior eyelet (1 extra-short, 1 short, 1 long) and 6 measuring gauges

With the help of this measuring gauge, it will be simple and intuitive to figure out which of the three available lengths will be the correct one.

# lip bumper

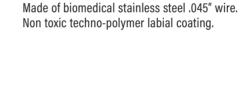

M3052-00
MINI LIP BUMPER BY PROF. NICOLA VELTRI

Designed by Prof. Nicola Veltri: this device is intended for use on patients with deciduous or mixed dentition with lack of space and/or small jaw with either sagittal or transversal dimension. The early application on deciduous molars positively stimulates the development of the mandible. The mini lip bumper is made with a special inclination of the archwire so as the anterior shield is positioned in the area where the lip is highly pushed forward and has a **stop adjustable screw** that makes a precise activation possible without the need of bending the wire. The adjustment of the stop requires the screwdriver REF P1520-00. **Pack of** 5

### extraoral facebows

Entirely made of biomedical spring stainless steel wire: the outer bow measures 1,80 mm in diameter and the single piece inner bow has a terminal portion of .045" (1,14 mm).

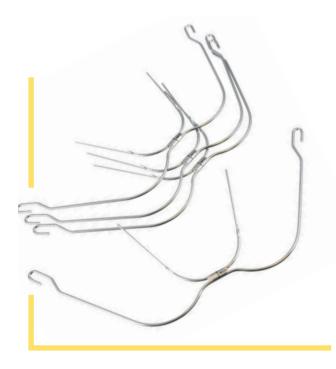

The laser welded bows joint, without the presence of solder material, is breakage resistant and avoids allergic reactions due to bimetallism. Midline and number clearly laser marked.

Bright polished for maximum hygiene.

Outer bow is available in three lengths.

Standard size is available with pre-formed loops, bites or double bites, all with the option of hooks for elastics.

**Caution:** All extraoral facebows are intended for use with Leone M0810 safety modules.

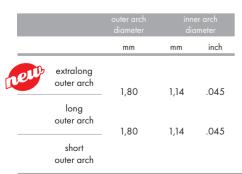

#### STANDARD EXTRAORAL FACEBOWS

Thanks to the choice of making the inner stainless steel onepiece bow integral with the end portion of .045" (1,14 mm), the realization of loops and/or bayonet stops does not decrease its structural resistance, by ensuring the transmission of extra oral forces to the tubes on the bands.

Outer bow available in three lengths and with the option of elastic hooks.

**Caution:** all extraoral facebows are intended for use with Leone M0810 safety modules.

## extraoral facebows

#### EXTRAORAL FACEBOWS WITH PREFORMED LOOPS

Thanks to the choice of making the inner stainless steel onepiece bow with the end portion of .045" (1,14mm), the preformed loops are easily adaptable to the patient needs but also very breakage resistant. Available in five sizes both with hooks for elastics for anteriors or with bite to facilitate lower intrusion.

Caution: all extraoral facebows are intended for use with Leone M0810 safety modules.

### extraoral facebows and accessories

### **EXTRAORAL FACEBOWS WITH SINGLE AND DOUBLE BITE**

The bite is made of stainless steel and it is laser welded to the front portion of the facebow.

Available with single or double bite, with soft or hard bite, with hooks and with hooks and elastic retractor.

**Caution:** all extraoral facebows are intended for use with Leone M0810 safety modules.

### M3620-01 SLEEVE FOR EXTRAORAL FACEBOWS AND HEADGEARS

Pack of 10

### M3307-00 WELDABLE STOP FOR ARCHES

Made of biomedical stainless steel. It is mostly used with intra oral arches and lip bumper. Just use a spot of a welding machine to fix it. For use with wire 1,14 mm (.045") in diameter.

Pack of 10

# M3309-00 FACEBOW SCREW STOP

Made of stainless steel. For use with wire 1,14 mm (.045") in diameter. Packs of 10

### M3309-95 FACEBOW SCREW STOP KIT

Pack content:

50 stop screws and 1 screw-driver

### face masks

### **FACE MASK**

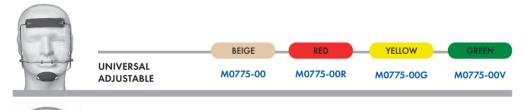

Used for treatment of maxillary insufficiencies, prognathism of the mandible and cleft palate. The reverse orthopaedic pull between maxilla and mandible facilitates the subsequent orthodontic treatment. Made of stainless steel wire and non toxic acrylic, it can be adapted to perform any individual size adjustment, either vertical or horizontal. All attachments are locked by set screws in metal housings. Face masks with zygomatic holds feature an adjustable strap band.

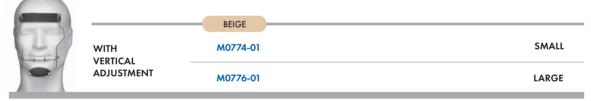

Pack of: 1 face mask, 1 screw wrench, instructions for use into a sleeve for patient

### M3613-01 SLEEVE FOR FACE MASK

For patient personal face mask. Transparent coloured, washable, fully neutral coloured.

Pack of 10

# safety headgear system

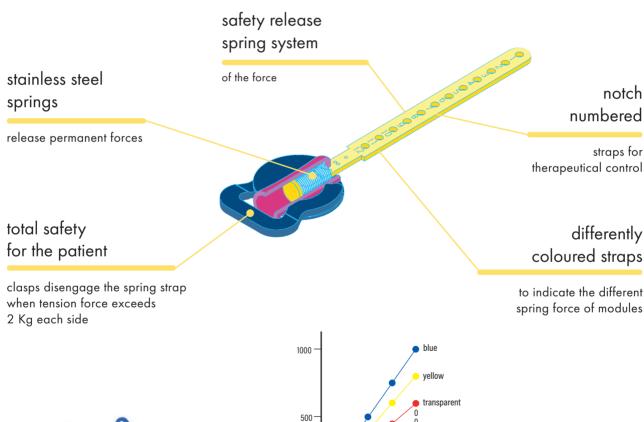

### **SAFETY HEADGEAR SYSTEM**

For use with the suitable headgear or neck pads only. Safety clasps disengage the spring strap when tension force exceeds 2 Kg each side.

This system avoids dangerous slingshot rebound injuries of the facebow in case of disconnection from headgear tubes. Coil springs are incorporated into the modules to provide constant traction force. Available in three colour-coded attachment straps showing the force level.

Pack of 10

light	transparent	M0810-01
medium	yellow	M0810-02
heavy	blue	M0810-03

Traction force released by each module can be easily controlled: when 2 notch tension appears on the plastic strap under traction, 2/4 (two fourths) out of the total deliverable force of the spring is going to be released. Above diagram shows the forces released by each type of module.
