PATENT PENDING

RPE FOR TADs

Thanks to almost 90 years of experience in the RPE mechanical manufacturing and the forefront attention to the latest technological and clinical innovations recently adopted for the Maxillary expansion, Leone is proud to launch the new Strengthened RPE for TADs. Along with 4 TADs attachments and a dedicated Swivel Key allows the construction of customized both Hybrid (teeth and Minimplants) and full Bone Borne RPEs.

CUSTOMIZABLE PLACEMENT

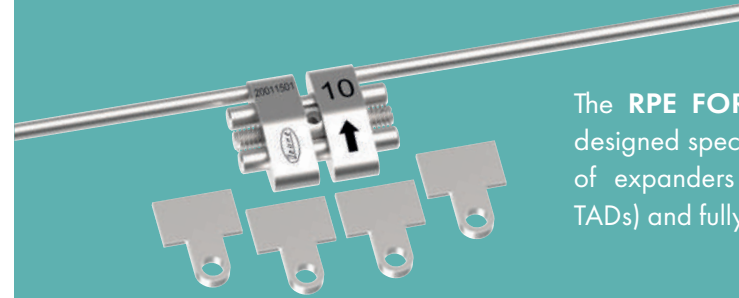

and orientation of TAD attachments

Activation with dedicated **STRENGTHENED SWIVEL KEY**

ENHANCED STRENGTH RPE screw, resistant more than 50kgf

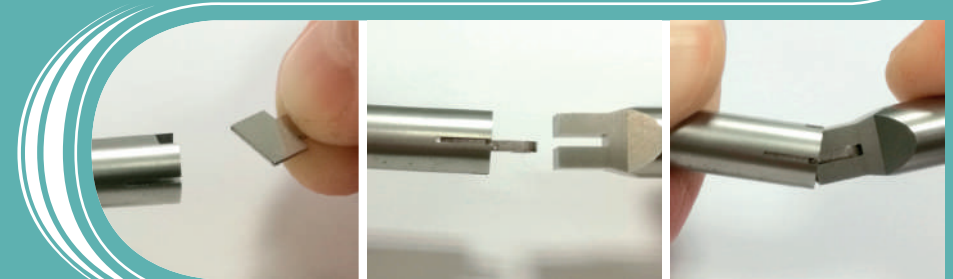

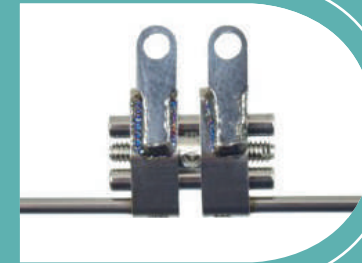

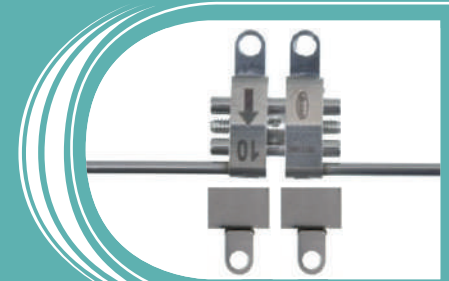

The **RPE FOR TADs expanders** are designed specifically for the construction of expanders both hybrid (teeth and TADs) and fully bone borne.

It features two posterior arms and, in the package, four TAD attachments are included that can be adapted to the patient's anatomy and welded by the lab on the body of the screw.

The strengthened expander ensures high resistance and reliability throughout all the therapy.

Thanks to the adaptable TADs attachments, it is possible to highly customize the RPE on each patient anatomy, both in TADs-first and TADs-last approach. Therefore, it can be achieved an optimized expansion load distribution on the TADs.

Available dedicated pliers for TADs attachments customization.
