SIMPLICITY OF CONSTRUCTION
AND APPLICATION

The orthodontic treatment requires more and more practical solutions to therapeutic problems. The orthodontist can make use of this screw range, designed with the assistance of the long-lasting clinical experience of Prof. Nicola Veltri, to have any biomechanical movements be induced like DISTALIZATION, MESIALIZATION, EXPANSION and MONO OR BILATERAL ROTATIONS.

BABY R.P.E. EXPANSION SCREW 2 Arms

Rapid palatal expanders with 2 or 4 arms. Both screws feature one guide only and expansion capacity up to 11 mm.
