# D.B. BRACKETS DIAGONAL ROUND WITH FDI IDENTIFICATION

## DIAGONAL ROUND ANGULATION

FOR EASY BRACKET PLACEMENT

**MAXIMUM COMFORT**  
THANKS TO REDUCED SIZES  
AND ROUNDED EDGES

**MIM® INTEGRAL  
BALL HOOK**  
ON CUSPIDS  
AND BICUSPIDS

## ANATOMICAL 80 MESH PAD WITH FDI IDENTIFICATION

FOR EXCELLENT BOND STRENGTH  
WITH THE USE OF ANY ADHESIVE

# D.B. BRACKETS DIAGONAL ROUND WITH FDI IDENTIFICATION

Manufactured using **MIM**® technology, in stainless steel welded on 80 gauge mesh sintered pads to ensure a secure bond strength to the tooth. Diagonal Round angulation, torque-in-base and calibrated sizes optimize biomechanics thus decreasing therapeutic time.  
Packs of 10

# D.B. METAL BRACKETS WITH FDI IDENTIFICATION

## ANATOMICAL 80 MESH PAD

FOR EXCELLENT BOND STRENGTH WITH THE USE OF ANY ADHESIVE, BICUSPIDS FEATURE A BONDING PAD EXTENDED TO OCCLUSAL TO MINIMIZE INTERFERENCES

## BALL HOOK

MIM® INJECTION MOLDED AND INTEGRATED ON CUSPIDS AND BICUSPIDS

## CENTRAL SCRIBE LINE

LASER MARKED BETWEEN TIE WINGS AND IDENTIFICATION  
DISTO-GINGIVAL DOT FOR EASE OF PLACEMENT

## FDI SYSTEM MARKING ON THE MESH PAD

An FDI (Fédération Dentaire Internationale) identification number is laser marked on the mesh pad of every bracket, clearly indicating the tooth to which a specific bracket will be attached. This method identifies each tooth with a two-digit Arabic number: the first digit indicates the quadrant, the second identifies the tooth according to Palmer's notation. For example: the bracket for the upper right central incisor has number 11 laser-marked on the mesh pad. The number, permanently etched and free of toxic substances, is immediately recognizable and easily readable without the aid of magnifying lenses.

The FDI system laser marking also improves bond strength.

## D.B. BRACKETS EXTREMO NO-NICKEL

# EXTREMO

Single piece bracket **MIM®**

- **PRECISION**
- **CONSTANT QUALITY**
- **NO SOLDERING POINTS**
- **COMPUTER DESIGNED**
- **ANATOMICAL BOND BASES**
- EXCELLENT BOND STRENGTH**
- **BIOCOMPATIBILITY**
- **PATIENT COMFORT**

**FDI SYSTEM MARKING**  
ON THE MESH PAD  
(FOR ROTH PRESCRIPTION)

**HIGH RETENTION BASE**  
WITH MICRO CAVITIES  
TO ENSURE STRONG RETENTION TO  
THE TOOTH

**MIM® TECHNOLOGY**  
PERFECTLY ROUNDED EDGES  
FOR MAXIMUM COMFORT

**Extremo nickel-free\*** brackets are entirely biocompatible. They are CAD designed to get anatomical fits and **MIM®** moulded in single piece, without any soldering point. The anatomical base features highly retentive micro cavities for a perfect bond strength and rounded edges to provide patient compliance. The base on Roth prescription brackets is laser marked with FDI number for immediate identification.

\*Nickel trace elements of  $\leq 0,1\%$  are due to the process of manufacturing

# SLIDE™ LOW FRICTION LIGATURES

**SLIDE** is a product manufactured with a special polyurethane mix for medical use. It is applied similarly to conventional elastic ligatures. Once placed on the bracket, it creates a passive ligature on the slot that makes the archwire free to **SLIDE** and to produce its effects on the dentoalveolar structures. This ligature can be used to create low friction with any bracket, but is especially recommended with Logic, Mini and Midi Diagonali, Aqua and Idea-L bracket lines. The particular conformation of the **SLIDE** ligature considerably improves patient's comfort during the first phases of treatment.

Packs of 10 modules, 6 ligatures each.

# INTERACTIVE D.B. METAL BRACKETS SELF-LIGATING

## Inter.\activeSL

**BALL HOOKS:**  
PERFECTLY SPHERICAL  
AND LOW PROFILE  
FOR MAXIMUM COMFORT.

**TIE WINGS:**  
FOR THE APPLICATION  
OF ANY KIND OF LIGATURE  
IN THE EVENTUAL NEED FOR  
A BIOMECHANICAL TOTAL  
CONTROL.

**SPRING CLIP:**  
MADE OF A HIGHLY ELASTIC ALLOY,  
IT GUARANTEES EASY AND SAFE  
OPEN/CLOSE MOVEMENTS.  
THE SLIDING PORTION OF THE CLIP  
IS CONSTRAINED BETWEEN THE BASE  
AND THE BODY OF THE BRACKET BY  
A LASER WELDING THAT PREVENTS  
THE POSSIBILITY OF DETACHMENT

**BEVELED SLOT  
ON MESIO-DISTAL EDGE:**  
ALLOWS SLIDING OF ARCHWIRES  
FOR HEAVY MISALIGNMENTS,  
WHILE AVOIDING NOTCHING  
AND BINDING.

**MIM® TECHNOLOGY:**  
THE IDEAL TECHNOLOGY FOR  
THE COMPLEXITY OF THE DESIGN,  
MAXIMUM ACCURACY OF THE  
SLOT AND UNDER THE TIE WINGS.

## MAXIMUM COMFORT AND VERSATILITY

InterActive SL self-ligating brackets, due to their design and reduced dimensions, offer a very comfortable treatment for the patient without loss of control. The interactive clip ensures an efficient clinical management with progressive biomechanical control to take advantage of the low friction early in treatment stages, while achieving perfect finishing with the final archwires.

## MATERIAL & DESIGN

The bracket body is made of biomedical steel and is laser welded on the 80 mesh gauge base with FDI identification. The colored dot with disto-gingival identification indicates each bracket quadrant, with the same color code of all Leone bracket range.

## INTERACTIVE CONTROL

The specific shape of clip and slot of InterActive brackets allows the user to modulate the most appropriate level of friction force between bracket and wire, depending on the needs of the various stages of treatment.

### PASSIVE PHASE

First stage round arches are not bound by the clip: the low friction will facilitate the process of alignment and leveling

### INTERACTIVE PHASE

Rectangular arch wires, used for space closure, rotation, and torque control, work to elastically deform the clip for the biomechanical control necessary in these stages of treatment

### ACTIVE PHASE

Rectangular arches for finishing and detailing completely fill the slot while going into active contact with clip: this allows the exploitation of elastic properties in order to obtain minimal movements for finishing of treatment.

## EASY OPEN/CLOSE

The clip has a central hole and does not require any special tool for opening and closing.

### OPENING

Insert the tip of a probe or utility tool into the hole in the clip and move towards the occlusal plane

### CLOSING

Slide the clip with a slight pressure towards the gums using a tool tip or even just a finger

## D.B. AQUA CERAMIC BRACKETS

### PURE AESTHETICS

- ENTIRELY MADE USING A SINTERED ANTIALLERGENIC POLYCRYSTALLINE ALUMINA
- MAXIMUM TRANSLUCENCE AND METAL SLOT FREE FOR NATURAL AESTHETICS AGAINST ANY SHADE OF ENAMEL
- LOW FRICTION BIOMECHANICS, USED IN CONJUNCTION WITH **SLIDE™** LIGATURES
- OPTIMAL MECHANIC RETENTION WITH THE USE OF ANY DESIRED ADHESIVE
- CUSPID AND BICUSPID BRACKETS WITH BIDIRECTIONAL HOOK

## D.B. AQUA CERAMIC BRACKETS

AQUA ceramic brackets are manufactured with a sintering process to achieve the purest alumina and a polycrystalline structure with an average uniform grain. The result is a bracket combining the best translucence with a superior mechanical resistance thus assuring a naturally aesthetic look to match every tooth shade. AQUA brackets are free of any metal slot and totally anti-allergenic. No specific primers are required since the base has got a new design providing a special mechanical retention, thus allowing the use of any orthodontic adhesive available. Polished surface, smooth edges and low profile design make the AQUA ceramic brackets superior in comfort.

# IDEA-L LINGUAL BRACKETS

IDEA-L lingual brackets feature small mesio-distal sizes, 1.4 mm depth and a special bracket design which make the application of Slide ligatures easy. In most cases, the use of a round wire **MEMORIA**® .012 is sufficient to get the solution of overcrowding and the aesthetic improvement of smile. In cases of dental rotations and/or major misplacements, wires of higher diameter, like **MEMORIA**® or Beta **MEMORIA**®, and conventional ligatures may also be used to gain biomechanical control. To get perfect alignment and levelling of the anterior teeth, an accurate position of the bracket is necessary; it is therefore advisable to use an indirect bonding technique with arch transfer trays made in the laboratory or with the special "Jigs" conceived for this technique.

## PROFILE OF 1,4 MM DEPTH

FOR PATIENT ACCEPTANCE AND MINIMAL SPEECH ISSUES

## CUSTOM DESIGN

MAKES THE APPLICATION OF THE **SLIDE**™ LIGATURE EASY AND KEEPS IT IN PLACE DURING TREATMENT

**SLIDE**™ LIGATURE EMBODIES THE PROFILE OF THE BRACKET, MAKING IT SMOOTH AND COMFORTABLE

## SPECIAL PLASTIC JIG (FOR RECOMMENDED INDIRECT BONDING)

1 Assemble jig on the bracket with the **SLIDE**™ ligature hooked under the gingival wing

2 Measure of the height of the selected jig on working cast and select correct size for the best bracket position

3 Position in the mouth and polymerization of the adhesive

4 Removal of the jig with a rotary movement

5 Bracket with the **SLIDE**™ ligature under the gingival wing

6 Bracket with wire and the **SLIDE**™ ligature in place

# MEMORIA® PREFORMED ARCHWIRES

In a superelastic nickel-titanium base alloy, these archwires provide gentle and continuous forces, reduce treatment time and improve patient comfort. The highly polished surface eliminates any bracket slot friction. Their non-deformability and superelasticity, which are expressed in the continuous force delivery over a wide deflection range, have been tested on thousands of treatments. Available in small, medium and large shape, both upper and lower, they represent the ideal answer to achieve your treatment goals.

# PEDODONTIC BANDS UNIVERSAL

DESIGNED TO MEET THERAPEUTIC NEEDS OF PEDIATRIC ORTHODONTICS BY ALLOWING EARLY TREATMENT OF PATIENTS WITH MIXED OR DECIDUOUS TEETH

### SHAPE AND HEIGHT

DESIGNED FOR THE ANATOMY OF DECIDUOUS MOLARS

### EASY FIT

TO THE PYRAMID-SHAPE OF PRIMARY MOLARS

### LASER-MARKING OF SIZES

IT ALLOWS THE STERILIZATION AT HIGH TEMPERATURES AND AN OPTIMAL VIEW OF SIZING OVER TIME

### USEFUL IN THE CONSTRUCTION

OF PALATAL EXPANDERS AND SPACE MAINTAINERS

### FREE PREWELDING SERVICE

CUSTOM PREWELDING SERVICE TO TUBE, BRACKET OR ACCESSORY WITH ITEM CODE G, CONTACT LEONEAMERICA FOR ASSISTANCE

# PEDODONTIC BANDS UNIVERSAL DECIDUOUS MOLARS UPPER AND LOWER

Available in 10 sizes, either for upper and lower, with LASER etched identification number. The medium temper of biomedical steel used to manufacture the bands allows the adaptation to the pyramid shape of the primary molars by minimizing the problems of detachment. Necessary for the construction of palatal expanders and space maintainers.

**Always specify the size  
when ordering e.g.: E6100-05**

CODE		pkg.	PRICE
<b>E6100-00</b>	Upper - PU sizes 1-10	5	<b>\$22.40</b>
<b>E6500-00</b>	Lower - PL sizes 1-10	5	<b>\$22.40</b>

## E6165-96 ASSORTMENT PEDODONTIC BANDS UNIVERSAL - KIT

The kit is composed of 5 universal pedodontic bands each upper and lower size, total 100 pcs. The tray is not autoclavable.

**PRICE \$175.20**

# CALIBRA® ANATOMICAL BANDS

**MADE OF HARD HEAT-TREATED STAINLESS STEEL**

**GRADUATED THICKNESS**  
BY VARIATION IN TOOTH SIZE

**INNER SURFACE  
ROUGH FINISH**

FOR MAXIMUM STABILITY  
AND INCREASED RETENTION

**ANATOMICALLY CORRECT**  
WIDE RANGE OF SIZES

**LASER-MARKING OF SIZES**  
ALLOWS THE STERILIZATION AT  
HIGH TEMPERATURES AND A  
DURABLE VIEW OF SIZING

**FREE PREWELDING SERVICE**

CUSTOM PREWELDING SERVICE TO ANY TUBE,  
BRACKET OR ACCESSORY WITH ITEM CODE G.  
READY DELIVERY OF STANDARD PREWELDED BANDS  
FOR THE MOST COMMONLY USED TECHNIQUES.  
CONTACT LEONEAMERICA FOR ASSISTANCE.

**WIDE CHOICE**  
OF ASSORTMENTS  
IN AUTOCLAVABLE TRAYS

SEE THE CONVERSION CHARTS AT PAGES 65 AND 66 OF **CLINICAL PRODUCTS** SECTION

## UPPER AND LOWER BICUSPIDS

Available in 32 sizes either for maxillary or mandibular arch, with LASER etched identification number. Their anatomical shape with contoured edges is designed for use either right or left. Thickness of 0,15mm and optional seating lug. The hard temper and a rough inner surface finish considerably improve cement retention.

**Always specify the size when ordering e.g.: E5101-11**

CODE		pkg.	PRICE

# SELF-DRILLING ORTHODONTIC MINI IMPLANTS

**NEW  
LINE**

**LeoneAmerica** is proud to announce that it is the sole distributor of PSM medical solutions products in United States. In collaboration with leading specialists, PSM has developed the unique Benefit TAD System for temporary fixation in the palate that ensures a high reliable palatal anchorage with Leone RPE4Tads AND Leone CAD/CAM expanders hybrid or completely bone borne. PSM offers high precision titanium medical grade implant screw and a large variability of prefabricated connecting elements and instruments. Full catalog available on request.

THE TRADEMARKS SHOWN FROM PAGE 38 TO PAGE 43 ARE NOT OF LEONE S.P.A. NOR OF LEONE AMERICA DENTAL PRODUCTS INC.

Call for a PSM pdf copy of the catalog or click here

Double hexagon to prevent rotation of abutments.

Internal thread for BENEplate fixation screw or the abutment screw.

**BENEFIT**

Increased thread depth and denser pitch design ensure maximum anchorage even in cancellous bone.

Continuously sharp thread flanks cut into the bone.

Self-drilling screw tip.

Optimized thread design leads to easy insertion without force (cork screw principal).

Non removable internal abutment screws.

single sterile packaging

Standard Abutment

Abutment with loop acc. to Dr. S. Renger, St. Louis, France

Abutment with 1 or 2 brackets

for more detailed informations download our new BENEFIT catalogue

## Skeletal anchorage in Orthodontics

An important requirement for successful orthodontic treatment is stable anchorage. Conventional orthodontic anchorage can be limited by periodontal disease and/or missing teeth. Skeletal anchorage has been proven to be very effective. It can be an essential part of non-compliance therapy and broadens the options available to the orthodontic practitioner.

Mini-Implants are especially advantageous because of the minimally invasive insertion protocol and their relatively low cost.

However, limitations can occur when conventional Mini-Implant Systems are used for orthodontic anchorage. In collaboration with leading specialists, *psm* has developed the unique **BENEFIT®** TAD System for temporary fixation in the palate. **BENEFIT®** offers high precision titanium implant screws and a large variety of pre-fabricated connecting parts such as **BENEplates**, abutments and palatal expanders.

With the introduction of the **BENEFIT®** System *psm* has considerably enhanced the therapeutic diversity of the treatments available for Mesialization, Distalization, RPE as well as uprighting or anchorage of the dentition.

With **BENEFIT®**, *psm* was the first company to offer a full range of skeletal anchorage appliances for the palate – a trend that has become state-of-the-art in Orthodontics.

**Distalization with *BENEplates***

**Mesialization with *BENEplates***

**Hybrid Hyrax**

# ORTHODONTIC MINI IMPLANTS

## SELF-DRILLING

The special design of the devices makes the insertion possible without the need of any pre drilling to prepare the implant site. The endosseous portion of the self-drilling mini implant features one apical portion (2 mm long) drill shaped in order to punch the bone and one threaded portion (1,75 mm in diameter and 6 mm long) with self-tapping coil for anchorage to the bone.

### INFORMATION FOR DISTRIBUTORS OF ORTHODONTIC MINI IMPLANTS, "INTENDED USE", "RESPONSIBILITY", "SURVEILLANCE"

The 93/42EEC directive on medical devices is the official reference that dictates the regulations for marketing medical devices. The directive provides indications for all the phases of existence for the device (from the project phase through the traceability system, and surveillance), and it identifies all the characters who have to comply with the directive itself, which includes not only the manufactures, but also the distributors, the buyers, and even the users. As for the responsibilities of the single competence, Leone S.p.A. recommends to its direct clients, dental depots and exclusive dealers to follow and maintain the indications, warnings, and information for the univocal identification of the medical devices, as provided by the manufacturer on the labels, during all the marketing phases. With specific regard to Class IIB implantable products, all dental depots and exclusive dealers of Leone S.p.A. are required to keep records of the distribution of medical devices as of traceability available for verification, in case of need to trace back a product or its user in a univocal way.

# SELF-DRILLING ORTHODONTIC MINI IMPLANTS WITH CLOSED DUAL SLOT

The head of the mini implant is available in two transmucosal heights and has a **closed dual slot** for the application of wire and/or spring segments. The **closed dual slot** section is .018"x.025" and can accommodate round or rectangular wires. A minimal invasive surgical procedure is needed: in one phase, transmucosal with very good primary stability for immediate application of the orthodontic traction.

Mini implants are supplied non-sterile (for the sterilization process see the instruction for use in the package), please use with the proper adapter for handpiece or with the screwdriver for hand insertion.

Packs of 1

CODE		Ø		PRICE
		mm	mm

## 080-1002-01 HANDPIECE ADAPTER FOR MINI IMPLANTS WITH CLOSED DUAL SLOT

For use with the handpiece for the insertion of self-drilling mini implants with closed dual slot also in difficult access areas.

**PRICE \$68.30**

## 080-1000-02 SCREWDRIVER FOR MINI IMPLANTS WITH CLOSED DUAL SLOT **PRICE \$169.60**

**080-1000-23  
REFILL TIP PRICE \$48.30**

# SELF-DRILLING ORTHODONTIC MINI IMPLANTS

The head of the self-drilling mini implant is available in two transmucosal heights, it is mushroom shaped to facilitate the application of elastic ligatures and coil springs. One stage, transmucosal and minimally invasive surgical technique is needed, with optimal primary stability for the immediate load of the orthodontic appliance. Self-drilling mini implants are supplied not-sterile (for the sterilization process see the instruction for use in the package), to use with the special handpiece adapter. The use of a surgical micromotor is recommended.

Packs of 1

CODE		Ø		PRICE
		mm	mm	
002-1708P01	<p><b>low head</b></p> 	1,75	8	<b>\$80.90</b>
002-1708P02	<p><b>high head</b></p> 	1,75	8	<b>\$80.90</b>

Once sterilized insert the head of the mini implant to the handpiece adapter Cat. 080-1002-00 (for Self-Drilling Orthodontic Mini implant) or Cat. 080-1002-01 (for Self-Drilling mini implants with closed dual slot) connected to a surgical micromotor.

Lean the drilling tip of the mini implant on the attached mucosa in the selected area. Exert a pressure gentle enough to punch the soft tissues till the cortical bone is reached.

Set the maximum speed on micromotor to 300 rpm and torque value to 40 Ncm. Start drilling the mini implant while irrigating abundantly with water. Immediately after having reached the cortical bone and as soon as the presence of a softer bone tissue has been detected, reduce the micromotor maximum speed to 50 rpm. Complete the insertion under these parameters.

## 080-1002-00 HANDPIECE ADAPTER

For use with the contra-angle for the insertion of mini implants also in difficult access areas.

**PRICE \$43.60**

### MINI IMPLANT EXTRACTION.

AT THE END OF TREATMENT, AND NEVER LATER THAN 6 MONTHS, THE MINI IMPLANTS HAVE TO BE REMOVED. TO REMOVE MINI IMPLANTS, THE SAME INSTRUMENTS ALREADY EMPLOYED FOR THE INSERTION CAN BE USED BY TURNING THEM COUNTERCLOCKWISE.

 The pictures and information described in this page have informative purpose only and they are not intended to furnish any therapeutic advice for the dental surgeon, the dentist, the dental technician or the patient. Leone Spa expressly disclaims any liability neither will furnish any warranty regarding the exactness or the conformance of the information furnished in these pages.

## FACE MASKS

Used for treatment of maxillary insufficiencies, prognathism of the mandible and cleft palate. The reverse orthopaedic pull between maxilla and mandible facilitates the subsequent orthodontic treatment. Made of stainless steel wire and non toxic acrylic, it can be adapted to perform any individual size adjustment, either vertical or horizontal. All attachments are locked by set screws in metal housings. Face masks with zygomatic holds feature an adjustable strap band.

Packs of: 1 face mask, 1 screw wrench, instructions for use in a sleeve for patient

**Caution:** these products contain natural rubber latex that may cause allergic reactions.

## SAFETY RELEASE MODULES

For use with the suitable headgear or neck pads only. Safety clasps disengage the spring strap when tension force exceeds 2 Kg each side.

This system avoids dangerous slingshot rebound injuries of the facebow in case of disconnection from headgear tubes. Coil springs are incorporated into the modules to provide constant traction force. Available in three colour-coded attachment straps showing the force level.

Packs of 10

CODE		color	PRICE
M0810-01	light	transparent	\$71.10
M0810-02	medium	yellow	\$71.10
M0810-03	heavy	blue	\$71.10

### STAINLESS STEEL SPRINGS

RELEASE PERMANENT FORCES

### SAFETY RELEASE SPRING SYSTEM OF THE FORCE

### NOTCH NUMBERED STRAPS FOR THERAPEUTICAL CONTROL

### TOTAL SAFETY FOR THE PATIENT

CLASPS DISENGAGE THE SPRING STRAP WHEN TENSION FORCE EXCEEDS 2 KG EACH SIDE

DIFFERENTLY COLORED STRAPS TO INDICATE THE DIFFERENT SPRING FORCE OF MODULES

Traction force released by each module can be easily controlled: when 2 notch tension appears on the plastic strap under traction, 2/4 (two fourths) out of the total deliverable force of the spring is going to be released. Above diagram shows the pull forces released by each type of module.

## EXTRAORAL FACEBOWS

Entirely made of biomedical spring stainless steel wire: the outer bow measures 1,80 mm in diameter and the single piece inner bow has a terminal portion of .045" (1,14 mm). The laser welded bows joint, without the presence of solder material, is breakage resistant and avoids allergic reactions due to bimetallism. Midline and number clearly laser marked. Bright polished for maximum hygiene. Outer bow is available in three lengths. Standard size is available with pre-formed loops, bites or double bites, all with the option of hooks for elastics.

**Caution:** All extraoral facebows are intended for use with Leone M0810 safety modules.

## STANDARD EXTRAORAL FACEBOWS

Thanks to the choice of making the inner stainless steel one-piece bow integral with the end portion of .045" (1,14 mm), the realization of loops and/or bayonet stops does not decrease its structural resistance, by ensuring the transmission of extra oral forces to the tubes on the bands. Outer bow available in three lengths and with the option of elastic hooks.

**Caution:** All extraoral facebows are intended for use with Leone M0810 safety modules.

## EXTRAORAL FACEBOWS WITH PRE-FORMED LOOPS

Thanks to the choice of making the inner stainless-steel one-piece bow with the end portion of .045" (1,14mm) or .051" (1,3mm), the preformed loops are easily adaptable to the patient needs but also very breakage resistant. The .045" is available in five sizes while the .051" is available in three sizes.

**Caution:** all extraoral facebows are intended for use with Leone M0810 safety modules.

## CLASS II CORRECTOR

The non-compliance device for Class II correction. The small sizes of the device allow for optimum patient comfort while the constant and light force delivered by the spring **MEMORIA®** 200 g, located inside the plunger, stimulates the mandibular advancement. In this **new version**, the **fluidity of movement and the strength of the telescopic mechanism are improved**. The packages include all the needful parts for the application of a bilateral correction device.

Available in **3 lengths** with both mesial and distal fitting to upper molar tube, for a total of 6 possible positions in the mouth. When used in the mesial position, it can be placed on a single direct-bonding tube without the need of band or round tube.

EXTRA-SHORT

SHORT

LONG

### MESIAL SUPPORT TO VESTIBULAR TUBE

### DISTAL SUPPORT TO VESTIBULAR TUBE

1:1

To avoid breakage, the device should not be mounted at full compression: once in the mouth in habitual occlusion, a portion of the plunger coming out of the tube for at least **2 mm** should be visible.

**AVAILABLE IN 2 VERSIONS:**

**1** WITH ANTERIOR EYELET

**2** WITH ANTERIOR HOOK

**M2301-91**

**CLASS II CORRECTOR KIT WITH ANTERIOR HOOK**

Pack of **3 correctors** with anterior hook (1 extra-short, 1 short, 1 long) and 6 measuring gauges  
**PRICE \$173.30**

**M2302-91**

**CLASS II CORRECTOR KIT WITH ANTERIOR EYELET**

Pack of **3 correctors** with anterior eyelet (1 extra-short, 1 short, 1 long) and 6 measuring gauges  
**PRICE \$173.30**

With the help of this measuring gauge, it will be simple and intuitive to determine which of the three available lengths will be the correct one.

**P1904-00**  
**LIGHT WIRE PLIERS**

Longer and more tapered beaks than Angle pliers. Excellent for bending small diameter loops. For wires up to .018" (0,46 mm).

**PRICE \$111.80**

**P1154-00**  
**OPTICAL STYLE PLIER, MEDIUM TIP**

For wires up to .028" (0,71 mm).

**PRICE \$121.00**

 **P1155-00**  
**OPTICAL STYLE PLIER, LARGE TIP**

For wires up to .032" (0,80 mm).

**PRICE \$100.30**

**P1905-00**  
**RECTANGULAR ARCH PLIERS TWEED STYLE SHORT JAW**

For use with square or rectangular wires. The blades are designed to be parallel at .020" (0,51 mm) pliers opening. Working edges are carefully bevelled with a diamond hone to prevent wire scoring.

**PRICE \$129.70**

**P1906-00**  
**THREE JAW PLIERS ADERER STYLE MEDIUM**

For wires up to .036" (0,91 mm).

**PRICE \$111.80**

**P1075-01**  
**THREE JAW PLIERS ADERER STYLE THIN**

For round wires up to .020" (0,51 mm) and rectangular up to .021"x.025" (0,53x0,64 mm).

**PRICE \$217.60**

**P1900-00**  
**BIRD BEAK PLIERS**  
**ANGLE STYLE**

Necessary for working round wires up to .032" (0,80 mm) in diameter. The beaks are .040"(1,02 mm) at the tip. A 9° angle is ground on the sides of pyramid beak to allow for wire springback. Beaks are parallel at .020" (0,51 mm) pliers opening.

**PRICE \$181.90**

**P1901-00**  
**LOOP FORMING PLIERS**  
**TWEED STYLE**

A plier designed to make loops in round or rectangular wires up to .022"x.028" (0,56x0,71 mm). The cylindrical beaks have two sections: .043" (1,09 mm) and .063" (1,60 mm).

**PRICE \$197.90**

**P1903-00**  
**YOUNG STYLE PLIERS**

For wires up to .040" (1,02 mm).

**PRICE \$126.00**

**P1907-00**  
**HOW STYLE PLIERS**  
**STRAIGHT**

The 3/32" (2,4 mm) gripping pads are serrated and shaped so that their center line coincides with the axis of rotation of the pliers. Beaks are rounded to be completely lip safe.

**PRICE \$111.80**

**P1908-00**  
**HOW STYLE PLIERS**  
**STRAIGHT**

Exactly the same as P1097-00. With 1/8" (3,2 mm) gripping pads.

**PRICE \$111.80**

**P1909-00**  
**HOW STYLE PLIERS**  
**OFFSET**

Exactly the same as P1908-00 with tips incorporating a 45° offset angle.

**PRICE \$129.70**

**P1910-00**  
**WEINGART STYLE**  
**PLIERS**

Classical design, the tips are carefully rounded to make this pliers completely mouth safe. Useful for removal of ceramics.

**PRICE \$129.70**

**P1915-00**  
**DISTAL END CUTTER**  
**WITH SAFETY HOLD**

The small dimensions do not interfere with quality. It cuts archwires and safely holds the loose distal end.

- Caution:** maximum cutting capacity:
- rectangular wire up to .022"x.028" (0,56x0,71 mm);
  - round wire up to .020" (0,51 mm);
  - twist wire up to .016" (0,41 mm).

**PRICE \$226.50**

**P1911-00**  
**STOP AND SURGICAL**  
**HOOK CRIMPING**  
**PLIERS**

A plier designed to crimp surgical hooks in the archwire. It can also be used to fix round or rectangular stops.

**PRICE \$143.30**

**P1914-00**  
**MICRO DISTAL END CUTTER**  
**WITH SAFETY HOLD**  
**LONG HANDLES**

The retracted position of 10° angled hand grip affords a wider view in the oral cavity.

- Caution:** maximum cutting capacity:
- rectangular wire up to .022"x.028" (0,56x0,71 mm);
  - round wire up to .020" (0,51 mm);
  - twist wire up to .016" (0,41 mm).

**PRICE \$253.60**

**P1090-00**  
**CAP REMOVER**  
**FOR CONVERTIBLE**  
**TUBES**

It makes the conversion of rectangular tube easy when banding of the second molar is required. Autoclavable.

**PRICE \$222.10**

**P1090-01**  
**REPLACEABLE TIPS P1090-00**

Pack of 2 **PRICE \$20.50**

**P1530-00**  
**LABORATORY PLIERS**  
**ADAMS STYLE**

Large tips with tungsten carbide inserts. Necessary for bending wires in the laboratory. A round cone tip of .052" (1,3mm) and a pyramid beak of .056" (1,4mm). For wires up to .060" (1,5mm)

Excellent for Crozat technique.

**PRICE \$195.30**

**P1034-00**  
**THREE JAW PLIERS**  
**ROUND**

Very sturdy, does not score wires. Suitable for bending the arms of expanders. For wires up to 1,5 mm. (.059")

**PRICE \$175.10**

**P1099-00**  
**HEAVY DUTY CUTTER**

For hard wires up to .060" (1,5mm)

**PRICE \$147.00**

**P1162-00**  
**UNIVERSAL PLIERS**

Extremely tapered design. For wires up to .036" (0,9mm)

**PRICE \$44.90**

**P1163-00**  
**UNIVERSAL PLIERS**

Classic design. For wires up to .036" (0,9mm)

**PRICE \$44.40**

**P1917-00**  
**HARD WIRE CUTTER**

For cutting orthodontic wires for fixed technique any size.

**Caution:** maximum cutting capacity:  
- rectangular wire up to .022"x.028" (0,56x0,71 mm);  
- round wire up to .020" (0,51 mm).

**PRICE \$195.30**

**P1919-00**  
**MINIATURE**  
**LIGATURE CUTTER**

For soft wires.

**Caution:** maximum cutting capacity: ligature wire up to .014" (0,36 mm).

**PRICE \$228.60**

**P1923-00**  
**POSTERIOR BAND**  
**REMOVING PLIERS**  
**SHORT**

**PRICE \$159.10**

Necessary for removal of posterior bands. A plastic padded tip and a sharp removing beak allow, with a slight pressure, high precision band removal.

**P1453-00**  
**REPLACEMENT PAD**  
**3/16" (4,8 MM)**  
**FOR P1923-00**

**PRICE \$15.80**

**P1621-00**  
**INSTRUMENT FOR**  
**ENDORAL ACTIVATION**

Suggested for use with multifunctional orthodontic screws.

**PRICE \$18.90**

**P1509-00**  
**STAINLESS STEEL UNIVERSAL**  
**BRACKET ALTIMETER**

A small device for measurement of the right height of bracket slots.

**PRICE \$81.60**

**P1026-00**  
**D.B. BRACKET TWEEZERS**

It holds any type of bracket, from a wide twin to a single one.

Self-locking of the bracket and release by pressure.

Several tweezers can be pre-loaded with brackets to bond them one after the other.

**PRICE \$40.40**

**P1098-00**  
**UTILITY INSTRUMENT**

**PRICE \$47.00**

**P1139-00**  
**LIGATURE TUCKER**

Double ended for placement or removal of elastics. Necessary for tucking metal ligatures. **PRICE \$39.10**

**P1001-01**  
**BAND DRIVER OFFSET TIP**

Fully made of stainless steel. For placement and adjustment of bands. Activation is ease in all positions. Seating pressure range 80 up to 1000 g.

**PRICE \$236.30**

**P1002-01**  
**REPLACEMENT TIP FOR P1001-01**

**PRICE \$35.70**

**P1000-01**  
**BAND DRIVER STRAIGHT TIP**

Exactly the same as P1001-01 but with straight tip.

**PRICE \$236.30**

**P1003-01**  
**REPLACEMENT TIP FOR P1000-01**

**PRICE \$35.70**

**P1505-01**  
**TWISTER**  
**FOR PREFORMED LIGATURE TIES**  
**K4430-25 AND K4480-30**

Fully made of stainless steel. Push the back button to insert the preformed ligature tie. It makes position and final legation easy.

**PRICE \$153.30**

**P1167-00  
TURRET

**P1635-00  
TORQUING INSTRUMENT  
FOR WIRE .019"X.025" AND .021"X.025"/.027"**

A device consisting of two components to easily apply torque to a portion of arch wire in proximity of a specific bracket. The instrument with the U end is used to mark out and maintain the selected portion of the arch wire. The additional instrument is used to firmly keep the rectangular wire and to apply the desired torque degrees. Thanks to the presence of a laser marked protractor, it is possible to check the degrees of torque given. One instrument end is for arch wires .019"x.025", the other for .021"x.025"/.027"

**PRICE \$124.20**

**R6000-00**  
**LEONEAMERICA**  
**COLOR GUIDE**

Colors illustrated are only indicative. Color may slightly change compared to those obtained with **LEONEAMERICA®** acrylic resin.

**PRICE \$13.70**

**R3712-00**  
**QUADRANGULAR**  
**WAX STICKS**

Wax in 25 cm long sticks, 3x3 mm cross section. The special adherence and high workability make it useful to border the impression trays to fit the edges of the functional impression.

Pack of 110 sticks

**PRICE \$60.40**

**R3710-00**  
**UTILITY WAX**

Highly soft wax in strips which bends at room temperature without breaking. Thanks to its good adherence and high workability, it serves to border the impressions to obtain the base of the mould.

Pack of 24 strips

**PRICE \$60.40**

**R3711-00**  
**MODELLING WAX**

Wax in sheets. It moulds, both cold and hot, without breaking.

Pack of 500 g

**PRICE \$47.30**

**R3730-00**  
**BITE WAX**

Necessary for taking accurate occlusal impressions. A special aluminium foil lessens distortions, 5 mm thick.

Pack of 24

**PRICE \$84.80**

# BIOCOMPATIBLE THERMOFORMING MATERIAL

Discs and square plates made out of PET G (Polyethylene Terephthalate modified with Glycol), a material ideal for thermoforming to manufacture dental aligners and post-treatment aesthetic retainers.

The material conforms to ISO 10993-1, and once formed, it features excellent optical transparency, with highly efficient biomechanical properties.

# BIOCOMPATIBLE THERMOFORMING MATERIAL HARD/SOFT

**NEW**

Discs and square plates featuring one soft and one hard side. The soft side is made of EVA (Ethylene Vinyl Acetate) and the hard side is made of PET-G (Polyethylene Terephthalate modified with Glycol). Acrylic resin is perfectly combined with the hard side of the thermo-formable material, making it suitable for the fabrication of splints for people suffering from bruxism or as a retentive base in the construction of complex acrylic appliances, such as anti-snoring devices. Once thermoformed, the material will get a high breakage resistance.

CATALOGUE SYMBOLS

On the various tables of catalogue we used symbols to better indicate the characteristics of our products. Below are the symbols used:	dimensions		angulation		
	diameter		rotation of tube		
one turn of screw		inner diameter		upper right	
expansion		torque of bracket		upper left	
length		torque of tube		lower right	
height		slot		lower left	

Safety data sheets of our products can be downloaded from our web site: [www.leone.it](http://www.leone.it)

PRODUCT LABEL SYMBOLS

The label on the package of any medical device set on the market will show the symbols in compliance with the harmonized standards. The symbols marked with a single (\*) are based on the ISO 21531, ISO 15223-1 and on the 93/42EEC Directive. The symbols marked with double (\*\*) have been instead adapted by Leone.

manufacturer's trade name and address	(*)	manufacturer's catalogue code	(*)	code number and product description in different languages	
CE mark (made in compliance with 93/42EEC Directive on class IIA or IIB medical devices)	(*)	expiry date, if the product is perishable (year/month/day)	(*)	storage temperature	(*)
lot number* (indicated by LOT mark)	(*)	for professional use only	(**)	for single use only	(*)
keep dry	(*)	this product contains Nickel-Chromium: possible allergic reactions	(**)	keep away from sunlight	(*)
CE mark (made in compliance with 93/42EEC Directive on Class I medical devices)	(*)	read the documents enclosed	(*)	gamma-ray sterilized	(*)
titanium	(*)	surgical steel	(*)	this product contains Chromium: possible allergic reactions	(**)
autoclavable at temperature indicated	(*)	with content or presence of natural rubber latex	(*)	non-sterile	(*)
do not use if package is damaged	(*)	read the instructions for use enclosed	(*)	bar code or Data Matrix	

\*Unless otherwise indicated, the LOT number explains the date of manufacture with the key YYMMDDNN (YY year, MM month, DD day, NN Leone progressive internal number of the lot). For example: 19021902 indicates the lot no. 2 of February 19, 2019.
